Cass County and Liquid Trucking Companies receive a clean air grant

Partnering with Cass County, Liquid Trucking Companies have been awarded \$400,000 in funding towards the construction and operation of a new Compressed Natural Gas (CNG) facility to be built on their property. The grant comes from the Nebraska Environmental Trust which seeks to award money to state wide municipal entities towards environmental improvement.

The grant will be distributed over a three year period. Initially, \$100,000 will be allocated to be used through June 2016. \$150,000 will be allocated for years two and three. OFC/Schmidt Liquid Trucking Companies will be funding the remainder of the cost to open and run the facility out of Plattsmouth, NE.

In addition to the environmental benefits, all entities surrounding the county will have an opportunity to see immediate savings in fuel costs following the completion of this project.
